

During the first part of Autumn Term in Zebra Class we have been learning about transport through songs, exploring the different sounds different vehicles make, creating our own vehicles out of recycling materials and also reading our focused story "Journey". During this term we will continue learning about vehicles, this time exploring sensory trays with different materials where vehicles can go (water, soil, sand, etc.).

We also learnt about Autumn exploring the colours in our surroundings and being creative with natural resources. We will continue exploring this season, observing the changes as we get in to Winter. We will also prepare for Christmas, decorating the class with our own creations and singing songs.
