

There is a very exciting topic that we will be doing in the Spring term 2020 and it is **Fashion and Design**. We look forward to learning about Fashion and different designs which we would like to do in Art and DT. We will focus on patterns, colour and design our own material e.g. using tie dye and this will be incorporated with Science where we will explore how different materials can be manipulated and changed e.g. tie dye, bleaching etc. In Maths we will be learning about angles to make a design. In English we will look and explore Fashion magazines and how fashion is advertised, looking at the language and focusing on grammar e.g. adjectives. We will look at magazines online too. We would also like to welcome everyone back and we wish everyone a good and safe 2021.
