

This Summer Term Zebra Class will be learning about “The World Around Me”. We will be learning about what makes our planet and how we live on it. From land and sky, to people and time. We will use Makaton signing and symbols to describe different features, and we will also continue developing our sensory system by exploring through our five senses. This term we will focus on the story: “Here we are” by Oliver Jeffers, which covers the themes of: our responsibility to the Earth, its occupants and environment, humans and our connections to the Earth, different species and how we should care for them, a sense of belonging and community and in general: How the Earth is and how it works!
