

Next half term Hippos will continue with their hard work in Phonics, moving on to phase 3 letters and sounds. We will be applying our knowledge to reading books and other words in our environment. Some children will use their reading skills to support reading comprehension of more complex texts. Some children will use sensory stories to develop a love of story.

In maths Hippos continue to work towards the Pre Key Stage Standards to develop their number sense and independent problem solving skills. We enjoy singing and dancing along to Maths songs to help us remember key number facts.

We hope to explore the world around us through trips into the community each week. We will go to Fairfield Park to play our favourite group games, hide and seek and the parachute.

We will continue to develop our physical and sensory skills each day with lots of messy play and using different pieces of physio equipment.
