

During the Summer Term Hippos will be working hard in communication groups to develop their attention, expressive and receptive language and using their communication devices. Some children will continue to work hard on the eye gazes and iPads to chat to their peers and express their opinions. Some children will be using the Little Room and Resonance board to initiate exploration and express their thoughts.

Our topic is The World Around Me. We hope to explore a variety of cultures, countries and religions. In MFL and Humanities we will explore Spanish speaking countries. In science we will learn about the different habitats around the globe and the animals that live within them.

We will continue to work hard in Maths and English, focusing on our blending and tricky words in phonics and our number skills in Maths.
