

As the new academic year starts and some children return to school, in Meerkats we welcome new children for the first time, joining with some of the old Meerkats. Some of these children are now ready to attend full time which will mean new experiences such as having lunch at school with their friends! During Autumn 1, we will learn with the topic "All about me" and what makes us special and unique. We will focus on "our body", learning about our body parts and how we can use them. As part of the topic, we will also start focusing on the new addition to the Early Years Curriculum, "Oral Health". We will learn why brushing our teeth is so important as well as eating healthy food and we will explore loads of activities to teach children how to do this while having fun! There are loads of exciting activities to come and we are looking forward to welcoming everyone in September!
