

In cognition, pre-formal learners will be developing their independent exploration during Active Learning and switch work. In communication, they will be engaging in daily Intensive Interaction sessions and communication groups.

Semi-formal learners will be developing problem solving skills in maths and using their communication aids for functional and social communication in communication. In science, semi-formal learners will be exploring forces. They will carry out experiments and take observations to find out about push and pull, friction and magnets.

We will be focusing on our OT programmes to develop our sensory integration and self-regulation.

We will be using our sensory room across the school day to take time to explore the items, music and projections that make us feel calm and happy as part of our SEMH development.

Our topic is Enterprise and Retail. As part of our Outdoor Learning and ASDAN, we will visit Kingston Market and develop our understanding of shopping in the community.

We will be exploring the play Much A Do About Nothing by William Shakespeare. We look forward to sharing the play as a sensory story adaptation, in the 4D POD and in our Tim and Carmen sessions as part of Shakespeare in Schools.
