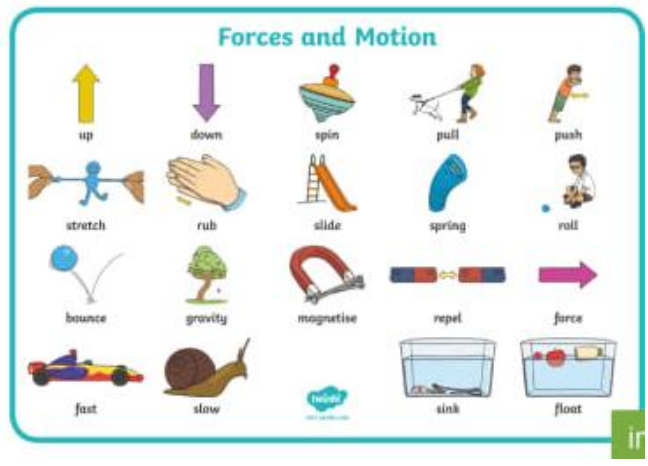
RUBIES CLASS SPRING 1 2022

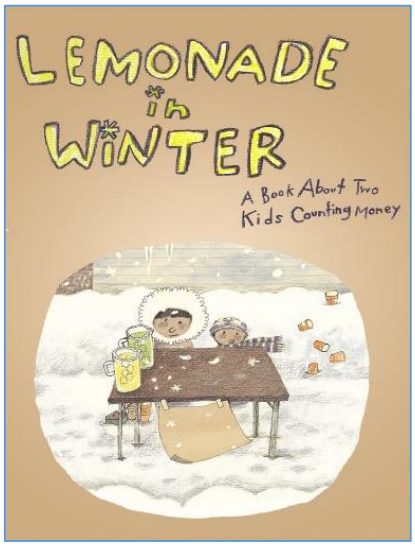
Rubies' Class will be exploring a range of new activities across the Spring Term. We are particularly excited about our new Science area of learning. Over the course of the half term we will be investigating a range of different forces. We will also be testing objects to see which items 'push' or 'pull.' Later in the half term, we will explore the concept of 'friction' by testing a range of objects to see which is the best surface when moving different items.

Our Maths work is linked to capacity this half term where we will be looking at comparing the weight of different objects to develop our understanding of 'lighter' and heavier'; alongside with looking at units of measure associated with weighing items. Our new area of learning will involve a range of practical activities ranging from weighing and comparing everyday items and looking at weighing food items during food technology lessons.

As the Spring Term approaches we very much look forward to starting our new shared text: 'Lemonade in Winter.' Many areas of our learning will focus on naming the characters and events within the text. In addition, to developing our inference skills when answering familiar questions.

During the Spring Term, we will be working on our class-based project: 'Much Ado About Nothing.' This is in association with Shakespeare for Schools; where we will work alongside with Tim to develop our understanding of drama and the wider aspects of preforming arts.

We look forward to sending home lots of photos from all of our areas of learning over the forth-coming term.




We wish you all a restful Christmas and look forward to welcoming everyone back in the new year.
