

We are looking forward to warmer weather so we can continue to improve our outdoor area. We are painting a bench, planting, and continuing with our landscaping with pea gravel project. We are also continuing our sensory story of Romeo and Juliet. We do this once a week and it is wonderful to watch students become familiar with the story and begin to anticipate resources. Phoenix are working on planning and implementing a Summer Fair for the rest of the students at the school to participate in as part of our community skills and enterprise. This is a big undertaking and we are looking forward to doing it. We are also completing a community project of making and delivering bags of necessities for homeless people. It is wonderful for students to feel like they are a part of and can contribute to their community.
