RUBIES CLASS SPRING 2 2022

Over the course of the half term we are looking forward to engaging with a range of new learning opportunities; alongside with consolidating previous areas of learning from the first half of the Spring Term.

Over the next few weeks we will continue our topic cycle: 'Markets and Enterprise.' During this time we will focus on how retail and the role of retail workers has changed over time. This will give us a wonderful opportunity to explore 'now' and 'then' when looking at our local town. Pupils will incorporate many cross-curricula learning opportunities, when taking photos of what our current town looks like at present and researching Kingston from the past, when drawing on similarities and differences.

As the Spring Term progresses we are hoping to visit Hampton Court Palace, where we will go back in time to discover what life looked at the 'King's Kitchen.'

This term, our ASDAN module will continue to focus on 'health.' Many of our learning opportunities will link to weekly Food Technology sessions, where we will make our own healthy food items. In addition, this will be a hands-on link when focusing on celebrations around the world, allowing us to compare and contrast different cuisines. Pupils will also have the opportunity to visit the local supermarkets to select and pay for items across the half term. This provides everyday opportunities to see modern retail, recognise logos and handle money in a practical context.

We look forward to many of the celebrations happening within class and the wider school environment. During this time, we will be focusing on RE where we will learn about Lent and Easter, and we look forward to having lots of fun when making pancakes and also getting creative when joining in with a range of Art and DT activities.
