

As the weather gets warmer and brighter, Meerkats will be enjoying our local trips to explore our topic "Travel: transport" where we will try to find different means of transport around us, looking at different ones and listening to their different noises. We will also read different stories about transport and explore them in class through singing songs. For Maths we will look at the characteristics of different vehicles ("How many wheels does a car have? And a bike?"), their colours and their sizes. We will explore small world messy trays to understand the different media where vehicles travel (land, air, water). We will create our own vehicles for our Expressive Arts and Design using junk modelling with recycling materials, using different tools. We will be very busy in Summer 1 and we look forward to it.
