

## GIRAFFE CLASS

SPRING 1 2023

In Communication, our focus for this term is to be able to give and follow instructions and for students to initiate requests or ask for help. We are focusing on being able to answer who, what and where questions with increasing independence. Our story for the term will be Handa`s Surprise, which we will read once a week.

We will continue to have discrete phonic sessions daily this term. Within these sessions we will work on blending to read words, spelling words and reading words in a sentence.

In Maths we are developing our understanding and concept of number. We will work on measurement and some of us will explore length and weight. We will be working on addition and subtraction and writing these number sums. Some of us will learn about the < and > symbols and how to use them to compare two different lengths or weights. We will all work on sequencing, using concepts such as now, next, tomorrow and yesterday.

In Science, our topic for this term will be sound. We will be exploring different types of sounds and exploring if standing far or near makes a difference to how loud we can hear a sound.

In Geography we will be looking at maps and learning about directions, North, South, East and West. In History, we will be learning about the Celts and we will be looking at what their homes looked like and what they wore.
