

During our next term, Spring 1, we will be learning about a new topic “The Natural World: Plants”. We will learn about what is around our natural world, how plants grow, how to look after them and look into different types of plants and flowers, and other natural materials, while learning about colours and sizes. Children will create their own flowers using different resources. Our focus book will be “The Tiny Seed” by Eric Carle, where we will learn about seeds, and the importance of the sun, the wind and water in the process of growing a plant. We will do some counting as well with any natural resources we find such as seeds, flowers, pebbles or logs.
