

In Spring 2 Emeralds will be continuing their topic of Animals and Life Cycles. We are going to be looking at the life cycles of butterflies, frogs and other creatures and explore whether animals come from eggs or not. Our key texts will be *The Hungry Caterpillar* by Eric Carle and *Tadpole's Promise* by Jeanne Willis and Tony Ross.

We are going to be looking at shapes in Maths and explore these in a sensory way and use them to make pictures and images. We are going to explore different 2D and 3D shapes in our classroom and also the wider school area. We are continuing our work on bridges and structures in DT and will be focusing on collaboratively building these from recycled materials.

In Science we are focusing on using switches to activate and control different sound sources such as musical instruments, speakers and other devices. We are going to explore patterns in music and sound and use lots of different apps and websites to help us explore different sounds and musical instruments.
